DETAILED ACTION

Election/Restrictions

1. Claims 1 and 12 are generic and allowable. Accordingly, the election of species requirement as to the encompassed species is hereby withdrawn and claims 2-6, 15-18, 20-23 are directed to the species of Figures 5,6,7,9,10 and 11 are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

2. In view of the above noted withdrawal of the election of species requirement, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Art Unit: 2827

The application has been amended as follows:

4. In the title: Delete title and add: -- Semiconductor Device having a wiring substrate with an exposed external-connection terminal --.

Allowable Subject Matter

5. The following is an examiner's statement of reasons for allowance: The prior art fails to teach, disclose, or suggest, either alone or in combination, at least on claims 1 and 12, a wiring substrate equipped with a rerouted wiring having one end connected to an electronic-part mounting pad for electrically connecting an electronic part and another end connected to an external-connection terminal, in which said wiring substrate comprises a base body having selectively formed thereon a low-elasticity underlayer, made of a material having a lower modulus of elasticity than that of the base body, in a pattern that the external-connection terminal is exposed in a surface of the base body, said underlayer being positioned between the base body of the wiring substrate and each of the electronic-part mounting pad and the rerouted wiring.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2827
